

**Grade 150-400**, Spruce timber (soft wood), granulated, low dust content  
free flowing, suitable for automatic filling systems

This product has been specially designed for laboratory animals and is equal to world-leading products.

**Grade 150-400** has:

- high absorbency
- low dust content
- high hygienic level

The bedding is granulated to be suitable for automatic filling systems.

**Grade 150-400** is:

- an economical answer to high quality expectations
- measured and multi-dust filtered wood chippings from untreated soft woods
- optimal for breeding and keeping of small animals in laboratory conditions

absorption capac.	≈ 3,1 l/kg	Sieve residue	1000 µm	≈ 99%
Bulk density	≈ 190 g/l	on vibration	2000 µm	≈ 75%
pH- value	≈ 5,5	sieve	3000 µm	≈ 5%
colour	beige			

### Raw Material

The bedding is made from renewable spruce trees without any chemical treatment. Only healthy and bark free trunks from pollution free regions are used. The PEFC Standard, which we were awarded, guarantees we manage the woodland in a careful and ecologically friendly manner.

### Quality Control

Regular sampling through independent and respected institutes guarantees consistent quality. Not only toxins but also the microbiological parameters are analysed.

### Packaging

The **Grade 150-400** is packed as follows (Item code / packaging):

- B.LBG15.10 10 kg PE bag, sealed, 36 bags = 360 kg per EUR-pallet
- B.LBG15.1000 BigBag small ca. 150 kg, medium ca. 225 kg, big ca. 450 kg;  
accounting by weight

### Note

The information above is based on actual knowledge and experiences. Minor variation can't be excluded. A legal binding agreement of particular properties is not given.
